PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student with hands-on internship experience in automated data extraction, web scraping, and data platform development, backed by a self-driven portfolio of AI-integrated applications. Proficient in Python and modern frameworks including Flask, FastAPI, and React, with practical exposure to machine learning, generative AI (Google Gemini), REST API design, and database-backed application development. Comfortable across the full development lifecycle — from data pipelines and backend APIs to responsive front-end interfaces. Seeking a full-time role as a Software Developer / AI Engineer building intelligent, production-grade applications.

3+ Featured Projects Shipped	1 Industry Internship	10+ Technologies & Tools

WORK EXPERIENCE

Data Automation & Software Development Intern | 3C Customerization Technologies Pvt. Ltd.

Apr 2026 – Jul 2026

- Web Scraping & Automation:** Developed automated data-extraction solutions to collect structured data from websites, designing reusable scripts to handle dynamic site structures and formats.
- Centralized Data Platform:** Contributed to building a platform for storing, retrieving, and visualizing extracted data, supporting reliable downstream analysis and reporting.
- Remote Collaboration & Practices:** Worked with mentor and team through regular catch-ups, following professional software delivery practices, version control workflows, and strict data security guidelines.
- End-to-End Ownership:** Owned data pipelines independently — from writing extraction logic to validating and structuring collected data under production constraints.

PROJECTS

ECCHO Social Follower Tracker | FastAPI · React · Supabase · Gemini AI

- AI-Powered Scraping:** Uses Google Gemini AI for high-accuracy numeric follower extraction from dynamic social media pages.
- Brand Validation:** AI verifies if URLs belong to the selected brand before scraping to ensure high data integrity.
- Reporting & Analytics:** Generates monthly aggregate snapshots, 15th & End-of-Month snapshots, Excel exports, and comparison dashboards.

AI-Based Medicine Recommendation System | Python · Flask · Machine Learning

- ML Model & Deployment:** Trained a machine learning classification model to predict likely diseases from user-input symptoms and recommend appropriate medicines.
- Pipeline & Web Interface:** Deployed the trained model through a Flask web application, handling data preprocessing, feature engineering, and real-time prediction output.

Ecom Review Miner | Python · Selenium · NLP · Scraping

- Automated Scraping:** Scrapes dynamic, paginated customer reviews from e-commerce platforms using Python and Selenium.
- NLP & Pipelines:** Performs NLP sentiment analysis and key phrase extraction, structuring raw review data into MongoDB/JSON pipelines.

SKILLS & TECH STACK

Programming Language	Python
Frameworks & Web	React.js, FastAPI, Flask, REST APIs, HTML, JavaScript
Automation & Data	Web Scraping, Selenium, Data Pipelines, Data Visualization, Google Sheets API, Supabase, MongoDB
AI / ML & Tools	Google Gemini AI, Machine Learning Basics, NLP, Git / GitHub, VS Code, PyCharm, OOP

EDUCATION & LANGUAGES

B.Tech in Computer Science Engineering (2022 – Expected 2026) | 12th: 60% • 10th: 80%

Languages: English, Hindi, Marathi
